TWO TEAMS

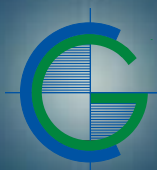

BECOME ONE: INTRODUCING

THE NEW TCG ROSENBLATT SHIP DESIGN DIVISION

On June 15th, 2008, the new TCG Rosenblatt Ship Design Division (RSDD), consisting of over 700 years of ship design experience, became part of The Columbia Group (TCG). TCG RSDD's capable professionals brought with them a strong naval architecture and marine engineering legacy, stemming from over 30 years of support to military customers in the Washington, DC metropolitan area.

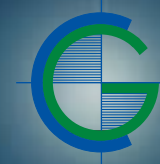

The Rosenblatt tradition of delivering quality and value to customers, and a nurturing and growth oriented environment for their employees, makes the new **Rosenblatt Ship Design Division** a natural fit within **The Columbia Group**. As with Rosenblatt, TCG places high priority on both the customers and the employees. These shared values have made the integration of Rosenblatt into The Columbia Group a smooth process.

The Columbia Group is committed to restoring the preeminence of the RSDD
